1. Edit of legend macros

To edit a legend in the SEMA program on the company-specific properties, proceed as follows:

Switch to Layout view. There are various standard plans of SEMA stored. Depending on the level in which you are located a Layoutplan opens.

<u>F</u> i	le <u>E</u>	dit	<u>V</u> iew	E <u>x</u> tras	<u>W</u> indow	2	Pitcl	h Roof	
E	, %	\mathscr{Y}_{\ge}	⊖ ک		A∰⇒ộ:	<u>م</u> 0	÷	4 \$	- 1
Master		¥ []		Pitch Ro	Layout				

If you are in the Layout view, the Plan administration button is available. In this menu, you can call up the settings for the screen layout.

An additional window opens. There are several plan administration options available.

To change the legend position, select "Legend editing".

The legend is a macro, which can be ungrouped into individual CAD lines, text components, and graphics. To edit the legend, it is necessary to ungroup the legend with the function ungroup. Therefore tag the legend and choose Macro \rightarrow ungroup.

Paste

Ctrl+V

If the legend are ungrouped, all parts off the legend are separately selectable. Depending on which template is used, there may still text modules that need to be ungrouped.

Now all the properties can be changed on the user request. To change the legend use the CAD commands, lines, graphics or texts.

For the texts, placeholders are used, which fall back on the building project properties or company address. The legend does not have to be changed manually because the program automatically uses the stored data for the legend.

SEMA GmbH • Salzstraße 25 • 87499 Wildpoldsried, Germany • Phone: +49 8304 - 939 0 www.sema-soft.com • info@sema-soft.com If you insert your own graphics, make sure you use a JPEG file. Put this in the legend. The position can be set via the position command.

If you finished your changes on the legend, mark the hole block. Make sure that all parts of the legend are marked.

Change the single lines into a macro with the command Macro \rightarrow Group.

	<u>1</u> 0	Copy with reference point	Sh	ift+Ctrl+C	
		Cut with reference point	Sh	ift+Ctrl+X	

After all CAD elements have been grouped, the changed legend can be saved. To save the legend in the master data proceed as follows.

Mark the hole legend and choose Macro \rightarrow Define.

			🚑 Macro

Important: Don't change the name of "Standard Ground Plan", otherwise the SEMA program can't automatically access to this Plan Layout. If you change the name, the program will use the standard layout of the work master data.

After all these steps have been done, the new legend is used for each newly created building project. If a new SEMA version is installed, the legend can be accepted with a data transfer. The legend is assigned via the SEMA settings.
